HIV Seroconversion Among Sailors and Marines in 2000

An updated, scripted, Powerpoint lecture was recently posted to the SHARP website. This lecture includes data regarding HIV seroconversion among active duty Sailors and Marines from 1985-2000, data regarding the number of Sailors and Marines on active duty from 1990-2000, and condom use among sexually active unmarried military members in 1995 and 1998.

Here is an excerpt:

Source: NNMC Bethesda, HIV Central, unpublished data, April 2001

HIV Seroconversion Rates (cases per 100,000 tested) Active Duty Members of the Navy and Marine Corps; 1990-2000

HIV seroconversion rates for active duty Sailors and Marines increased in calendar year 2000. Among Naval personnel, the rate of newly identified HIV positive members per 100,000 members tested rose from 16 to 21. Among Marines, the rate rose from 10 to 16.
